

## The RFID product range from UPM Raflatac Supply Chain Management

**Select a truly global partner.  
UPM Raflatac has high capacity  
RFID production on three  
continents: North America,  
Europe and Asia.**

UPM Raflatac RFID tags and inlays are designed to meet the requirements of the global supply chain and consumer electronics industry.

Our portfolio of broadband Gen2 products incorporates various delivery formats and face materials for every region worldwide. A broadband RFID antenna design enables end-users to reach and sustain consistently high levels of performance in all UHF frequency regions around the world with the same tag, regardless of local frequency regulations.

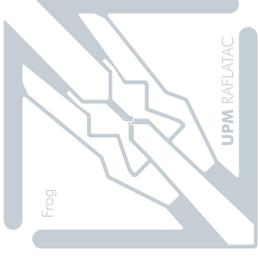

This represents critical competitive and logistical advantages for any FMCG company with customers as well as manufacturing and distribution facilities located in different parts of the world. The same RFID tag can be used by the manufacturer, logistics service provider and retailer to track and identify products accurately and cost-efficiently throughout the supply chain.

UPM Raflatac's RFID operations are certified to ISO 9001 quality standards and ISO 14001 environmental standards.

UPM Raflatac. Pro RFID.
